### Training

Based on more than 40 years of research and data collection, the LEOKA Program provides free Officer Safety Awareness Training (OSAT) to city, college and university, county, state, tribal, federal, and international law enforcement agencies. The goal of the LEOKA Program's OSAT course is to provide relevant, high quality, potentially lifesaving information to law enforcement agencies focusing on "why" an incident occurred, as opposed to "what" occurred during the incident. Training is offered in a 4- or 8-hour block of instruction. Information regarding training can be requested through:

**[leoka.training@fbi.gov](mailto:leoka.training@fbi.gov)**

LEOKA data is available to all LEEP users. LEOKA's Community of Interest within JusticeConnect provides access to the LEOKA publications, research studies, and information regarding the OSAT course.

## DATA COLLECTION

The **FBI LEOKA Program** provides services to the law enforcement community relative to officer safety. The Program can be described as a three-pronged service: data collection, research, and instructional services. Through these services, LEOKA strives to provide potentially lifesaving information.

### Data Collection

The LEOKA Program collects data for incidents during which officers are feloniously killed, accidentally killed, and assaulted in the line of duty and is made available in an annual

## RESEARCH

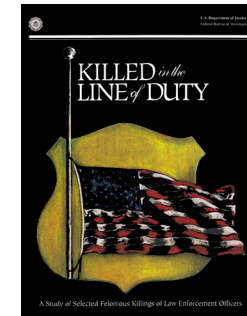

publication. Beginning with the 2005 edition, the FBI began publishing *Law Enforcement Officers Killed and Assaulted* exclusively as a Web publication. That report, along with the subsequent publications, contains all the information published in previous years' hard copy reports but with the benefits of navigable files and downloadable information.

Annual *LEOKA* publications are available on the FBI's Website. Click on the appropriate year to access the desired annual publication.

### Research

Utilizing reported data, the LEOKA Program conducts research on law enforcement officers feloniously killed or assaulted in the line of duty. Since 1992, the Program has completed three research studies: *Killed in the Line of Duty* (1992); *In the Line of Fire* (1997); and *Violent Encounters* (2006). These studies involved extensive interviews of officers and offenders who were directly involved in a critical injury assault. The results derived from the studies provide a better understanding of why attacks occur.

***Violent Encounters:***  
A Study of Felonious  
Assaults on Our  
Nation's Law  
Enforcement Officers  
(August 2006)

These studies can be found on LEOKA's Community of Interest within JusticeConnect in the FBI's Law Enforcement Enterprise Portal (LEEP).
